

Ronit Rai

SOC Analyst · Penetration Tester · Digital Forensics

✉ ronit.raii2004@gmail.com github.com/ronitraii ronit-rai-portfolio.vercel.app 📍 Pakistan

Summary

Entry-level cybersecurity professional with hands-on SOC, penetration testing, and digital forensics experience across three internships. Built ML-powered threat detection systems (~88% IDS accuracy) and automated security tooling in Python. **Top 1.5% nationally** — HEC NCAT 2026 (73/100, 98.5th percentile, 33,000+ candidates, 190 universities).

Technical Skills

Security	SOC Monitoring, Incident Response, Threat Hunting, Vulnerability Assessment, Digital Forensics, MITRE ATT&CK
Tools	Kali Linux, Burp Suite, Wireshark, Nmap, Metasploit, Autopsy, Volatility, Splunk/SIEM
Programming	Python, Bash, SQL, JavaScript, C/C++
Concepts	OWASP Top 10, IDS/IPS, Malware Analysis, Network Forensics, SIEM Log Analysis, CSRF, SSL/TLS

Experience

Cybersecurity Intern · Nuexus Technologies Sep 2025 – Dec 2025
Remote

- Completed 10+ Hack The Box challenges across enumeration, exploitation, and defensive techniques.
- Built a Python port/service scanner, **reducing manual assessment time by 60%**; documented findings with remediation steps.
- Conducted network reconnaissance using Nmap to identify open ports, services, and attack surfaces.

Digital Forensics Intern · Cyborts Jul 1 – Jul 31, 2025
Remote

- Performed disk and memory forensics with Autopsy and Volatility; reconstructed incidents from deleted files and timeline artifacts.
- Prepared forensic reports following chain-of-custody and evidence-handling procedures.

Security Intern · Developers Hub Corporation Apr 2025 – May 2025
Remote

- Tested web applications for OWASP Top 10 vulnerabilities (SQLi, XSS, auth flaws) using Burp Suite and Kali Linux.
- Assisted in secure code reviews and produced structured vulnerability reports with remediation guidance.

Key Projects

Threat Intelligence Hub [GitHub](#)
Python · PyTorch · Isolation Forest · Autoencoders · Flask

- 4-module platform: Network IDS (~88% accuracy), log analysis, malware detection (~87% accuracy), and incident response dashboard.
- REST API with real-time alert visualisation; built over 1.5 months using ensemble ML methods.

AI-Based Image Manipulation Detection [GitHub](#)
PyTorch · ResNet50 · DeepLabV3+ · Flask · Next.js · Docker · CI/CD

- Forensic platform detecting deepfakes and image forgery; containerised with Docker, deployed via GitHub Actions CI/CD.

Web Vulnerability Scanner [GitHub](#)
Python · Flask · DVWA

- Automated OWASP Top 10 scanner (SQLi, XSS, CSRF, headers, SSL); validated on DVWA with JSON/HTML severity reports.

Education

BS Computer Science — Sukkur IBA University 2022 – 2026 (Expected)

Certifications & Achievements

HEC NSCT 2026 — 73/100 · 98.5th Percentile · Top 1.5% of 33,000+ candidates across 190 universities	2026
Google Cybersecurity Professional Certificate	2025
Google Cloud Security Certificate	2025
Internship Certificates — Cyborts (Digital Forensics) · Developers Hub Corporation · Nuexus Technologies	2025
